

LED Lamp – User manual

*Thank you for your trust,
Your purchase support the development of
Egeiro's vision towards a more sustainable and
responsible way of manufacturing.*

1

Plug-in the power supply and the micro-USB cable included in the back connector.

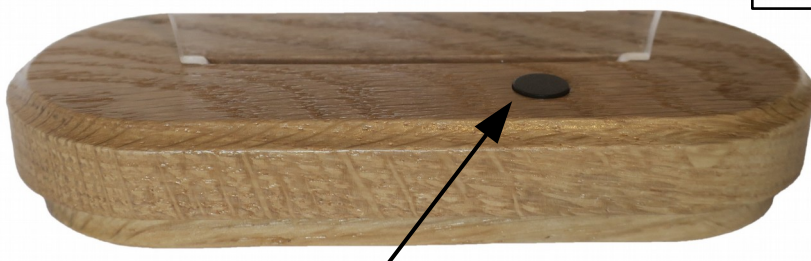

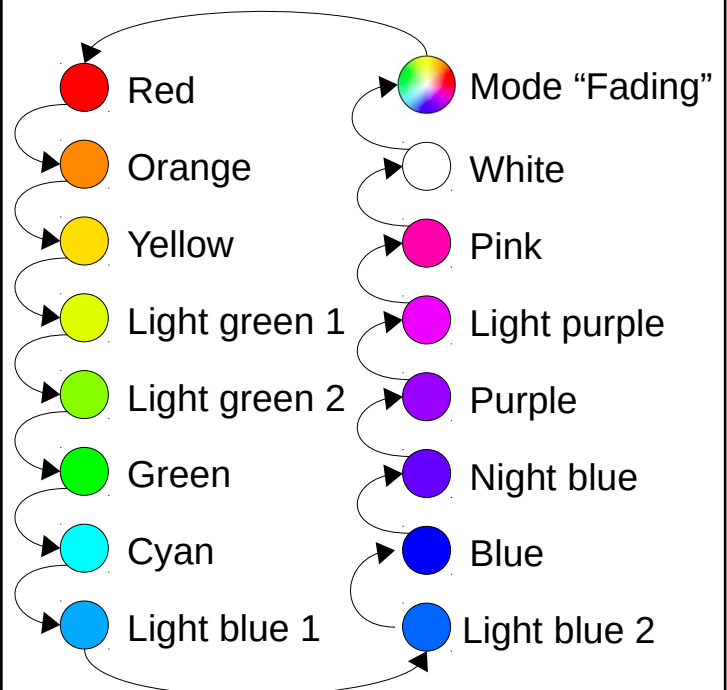

The color, mode and light intensity are automatically saved when the lamp is turned off or unplugged.

This memorization happens about 5 seconds after the last change of color/mode/intensity and do not require any particular action.

3

Do short press on the back button to select one of the following color or mode:

2

Do a short press on the front button to turn on/off the lamp.

Do a long press (>1 second) to adjust the light intensity among the 4 different levels.

For any help or question, feel free to contact Damien Dando via email (contact@egeiro.se) or phone (+46730935610).
